---

## ■ PRODUCT DESCRIPTION

---

Efficient, compact and sturdy design guaranteeing long-life operation with minimal spare part need. The modular design enables a range of different infeed and rotor configurations. Large service hatches and easily exchangeable reversible wear plates facilitate maintenance.

---

## ■ PRODUCT ADVANTAGES

---

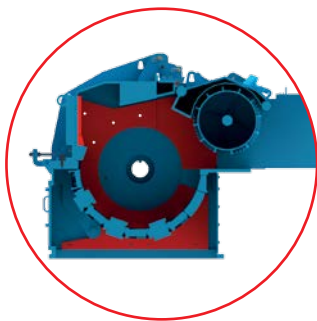

- Robust and compact design
- Oversized hammers and anvils for powerful action
- Easy access for maintenance
- Low maintenance costs
- Flexible use due to various screen possibilities
- Insensitive to small mineral and organic contamination

---

## ■ APPLICATIONS

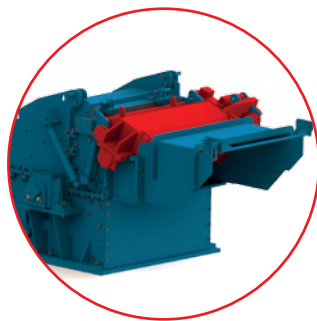

---

Bark  
Forest residues  
Waste wood  
Sawmill waste

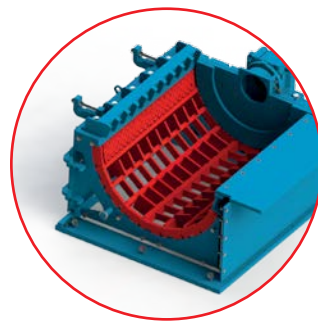

### WEAR PLATES INSIDE MACHINE HOUSING

Replaceable wear plates for long-life operation.

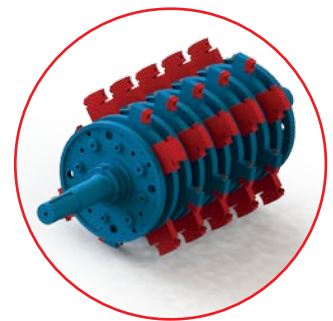

### UPPER INFEED ROLLER (OPTIONAL)

For horizontal fed machines to support proper infeed in case of difficult raw materials.

### SCREENING AND MILLING SEGMENTS

Various screen designs in accordance to customer-specific applications. Turnable screening segments designed for easy maintenance.

### ROTOR

Rotor with fixed and flying hammers. Hammer design depending on individual applications.

Type	Rotor $\varnothing$ [mm]	Weight hammer [Kg]	Thickness sidewall [mm]	Thickness wear plates [mm]	Motor power [kW]
8- 8	800	13	20	30	90-132
8-10	800	13	25	30	110-160
10-10	1000	20	25	30	132-200
10-12	1000	20	25	30	160-250
12-12	1200	25	30	40	200-315
12-16	1200	25	30	40	250-315
12-18	1200	25	30	40	250-315
15-12	1500	55	40	50	250-400
15-16	1500	55	40	50	355-560
15-20	1500	55	40	50	400-710

# ACTING WORLDWIDE FOR YOU

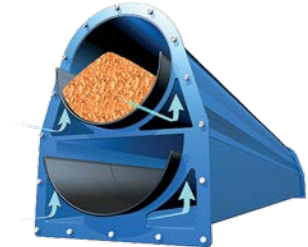

We are one of the world's leading manufacturers for the pulp and paper, the chipboard, the recycling industry as well as for the disposal of waste wood in the sawmill industry.
